nshaker

## automatic marker and optimizer

SAVE TIME. SAVE FABRIC. SAVE MONEY.

Optimize marker configurations in as little as one minute. Minimum of 2-3% savings in fabric length over all leading automatic marker programs. The most efficient marker software on the market!
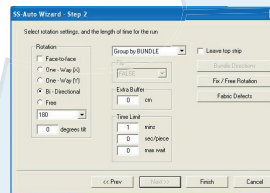

NShaker provides three simple options:
* NS-Auto- which builds a marker from scratch.
* NS-Optimizer- which reduces fabric on prexisting markers.
* Queue- which sets up multiple markers to run in sequence.

Simple Interface. Option to separate marker into blocks.

Control time limit. Near optimal results found in <2 minutes. Adjust piece rotation, overlap and tilt.

Specify orientation of paired pieces.

Marker saved directly in native Lectra, Accumark or as dxf file.
